Abstract

Here in this paper we will review p2p network security issues, which is the subject of serious consideration should be given to him a full and carefully examine the condition of a people here will p2p system structures and attacks that may occur to p2p networks, as well as the potential for these attacks antibiotics and we will review the security issues that are in the routing Home p2p protocols and we will solve the major problems that occur in the exchange of files and applications on the network p2p process.
