Abstract

Throughout this paper, we investigate the Hyers-Ulam stability of k-Tribonacci functional equation if \((k, x) = k f(k, x - 1) + f(k, x - 2) + f(k, x - 3)\) in the class of functions \(f : \mathbb{N} \times \mathbb{R} \to X\) where \(X\) is real non-archimedean Banach space.
