Abstract

The goal of this paper is to design a notification system using Android application to connect it to the educational web site of the university. It achieve high and quick organize between instructor and students, save time, effort by connecting Android application to the educational database of the university using latest technologies. It provides a wide range of information about education, courses, and all about college students that help the instructor to select to whom he/she will send notifications. It also includes sending notifications, attendance, viewing academic details like exam results.
