Abstract

The Project Management Application is a web-based application that focuses to help students track their project schedule and activities, collaborate with the other project members and their guide; also discuss the various project related details in the discussion forum. The different features of the project management application have been discussed along with the platform used for developing this application. This project management application can be used by the students of any branch and field and thereby will be useful for the guide to analyse the productive work by the project members.
