Abstract

Over the years the IT world has changed a lot. With the introduction of new technology, the IT sector has presented a totally new face to the world. Cloud computing was introduced way back in 1990’s. But it came in light in 21st century. Many surveys by many international organizations have been done. And which are reviewed in this paper. This review paper also highlights a comparative study between many companies. It also highlights various cloud services, deployment models and also the main characteristics. There is a difference which is also stated in this between various other paradigms which seems to be like cloud environment.
