In this paper we introduce a new class of sets called $(1, 2)^*-\text{gb}$-closed sets and a new class of generalized functions called $(1, 2)^*-\text{gb}$- continuous maps and $(1, 2)^*-\text{gb}$- irresolute maps in bitopological spaces. Also we obtain basic properties of $(1, 2)^*-\text{gb}$-closed sets. Further, we introduce a new space called $(1, 2)^*-\text{gb}$-space.
