Abstract

In this paper, we prove common fixed point theorems for a pair of weakly compatible maps under E. A. property. A major benefit of property (E. A.) is that it ensures convergence of desired sequences without completeness. At the end we rectify the main result of the paper, entitled "Common fixed points for weakly compatible maps, Proc. Indian Acad. Sci. (Math. Sci.) Vol. 111(2001), No. 2, pp 241-247.
