Abstract

In this paper, we aim particularly to deal with cases where it's possible for people to be able to learn a particular language and improve their grammatical mistakes through the predictive typing features like auto-correct and auto-complete in Smartphone Keypad Applications. Also, if they are aware of any such application and just more comfortable making mistakes while typing without such features. We have laid a survey from a number of random working and studying crowd and tried to understand if these applications helped build their
Are Predictive Typing Features in Keypad Applications Improving our Language or not.
