Abstract

The era of social networking has increased the amount of data generated by the user. People from all over the world share their opinions and thoughts on the micro-blogging sites on daily
A Survey on Twitter Sentiment Analysis with Various Algorithms

basis. Twitter is one of the most widely used micro-blogging site where people share their reviews in the form of tweets. The short and simple nature of the tweets makes it easier to use and analyze. The tweets also provide a richer and more varied content of opinions and sentiments about the latest topics. Sentiment is the feeling or attitude towards something and sentiment analysis is analyzing or studying about the various reviews given by people. The process of Sentiment Analysis tends to understand these opinions and categorize them into positive, negative, neutral.
