Abstract

Database is not static but rapidly grows in size. These issues include how to allocate data, communication of the system, the coordination among the individual system, distributed transition control and query processing, concurrency control over distributed relation, design of global user interface, design of component system in different physical location, integration of existing database system security. Design Strategies of Database on basis “GOMWTDS” Methods.
Design Database Strategies on basis “GOMWTDS” Methods

- Dixu “Distributed Database System Design”; Minnesota State University Kankato.
- Lei Jiang, Thodoros Topaloglou, Alex Borgida, John Mylopoulos “Goal Oriented Conceptual Designing”; (2007)
- Min CAO, Shu LUO, Huaikou Miao “Tree Based database desiging”; School of Computer Engineering & Science 4th International Conferenc on computer Science & Education.
- Wang heyong “Star like model database design for GEIS”; Second International Conferenc on E business & E government;
