

International Journal of Computer Applications is the place for exchange of information and research results within the following scope::

1. Machine Intelligence with specific emphasis on:
 - Expert, Agents, Diagnostic and Decision Supporting Systems
 - Data and Web Mining
 - Neural Networks, Fuzzy Systems, Rough Set Theory, Chaos Theory and Evolutionary Algorithms
 - Reasoning, Knowledge Extraction and Knowledge Management.

- Applications of Computer Science in Modeling.
- Visualization and Multimedia.
- Data and Information Systems.
- Internet and Distributed Computer Systems.
- Semantic Web Technologies and Social Semantic Web
- Graphics and Imaging
- Bio-informatics
- Natural Language Processing
- Computational Mathematics
- Robotics and Micro-Robotics
- Theoretical Informatics
- Quantum Computing
- Software Testing
- Computer Vision
- Digital Systems
- Pervasive Computing
- Computational Topology
- Information Personalization
- Human-Computer Interaction
- Ensemble Modeling
- Wavelet Representations
- Principle of Concurrency
- Software Life-cycle Management
- Social Network Mining
- Embedded Systems
- Pattern Recognition
- Signal Processing
- Bayesian Statistics
- Adaptive Control
- Sequential Decision Theory
- Digital Forensics
